Zenolite glass effect panelling

THE AWARD WINNING ZENOLITE PANEL BRINGS LIFE TO SHOWER WALLS AND KITCHEN SPLASHBACKS

Zenolite is an advanced multi-layer acrylic sheet that looks just like glass. Zenolite applications include kitchens, shower walls and bathrooms.

Weighing less than a quarter of a traditional glass sheet, Zenolite has 20 times the impact strength. The colour is permanently fused to the clear layer and cannot be separated by moisture. It is highly resistant to harsh chemicals like bleaches and solvents and because of its unique hard coated surface, Zenolite also offers a high scratch resistance

EFFORTLESS TO INSTALL

Zenolite is easy to work with and can be installed rapidly over new or existing wall finishes.

- Can be cut and drilled on site with standard wood working tools
- Typical panel install takes about a third of the time of ceramic tiles
- Joints can be sealed with neutral cure silicone or specially designed profiles

EASY TO MAINTAIN

Zenolite is easy to clean using warm water and a soft microfibre cloth or chamois. Strong chemicals are not required.

- No grouting and less joints
- Non-stick surface will not promote mould, bacteria, soap or calcium build up
- Highly resistant to typical shower and glass cleaners

LUXURIOUS AND ELEGANT FINISH

Each Zenolite polymer panel is meticulously finished, perfectly smooth, and looks just like glass.

- High gloss lustrous surface
- Glass-like depth of colour
- Will transform and add colour to any bathroom or kitchen

PANEL PROPERTIES

High Performance

Zenolite features an integrated colour layer, a thick optical grade clear layer and a high performance hard coat on the outer surface.

- High chemical and stain resistance
- High scratch and wear resistance
- Co-extruded colour layer
- High heat and thermal shock resistance

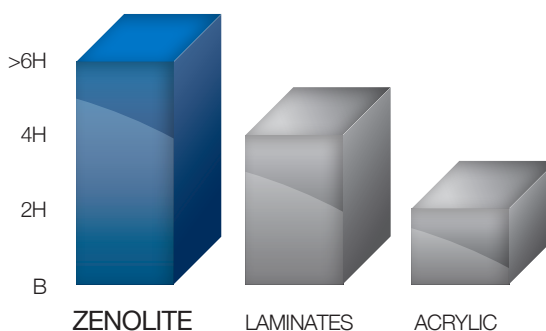

Note: Zenolite is for indoor, vertical surfaces only and should NOT be used in contact with direct heat source above 70°C (158°F).

CHEMICAL RESISTANCE

Zenolite is suitable to use with typical soap, liquid soap, shampoo and conditioners. Zenolite is compatible with cleaners such as Domestos®, Glass Cleaners, Acetic Acid 5%, Citric Acid, Mineral Turpentine, Bleach and Isopropyl.

Note: Not suitable for use with strong alkalis.

* suitable for ceramic, electric or induction hobs. Panels are not to be used directly behind or adjacent to a heat source above a continuous service temperature of 77°C. When used behind electric, ceramic or induction hobs a clearance of at least 50mm is essential between the edge of the hob and the panel. Zenolite is **NOT TO BE USED** behind a gas hob (naked flame). Please see page 7 for the gas hob installation options.
